GROUP

RESISCAPE Pavei NATURAL PAVING Luxigraze PIAZZA BAKSTEEN ESIN BOUND AGGREGATES ARTIFICIAL GRASS

Welcome to Talasey

The Talasey Group brings together a diverse and high quality range of landscaping products, providing designers, landscape architects, installers and home owners with a one stop shop from which to create inspired outdoor living spaces.

Our collection is one of the UK's largest ranges of landscaping materials, with options to suit all tastes, projects and budgets as we provide:

The very best natural stone landscaping materials from across the world. The majority of our stone is Indian sandstone, which follows a careful journey that we oversee from quarry to your garden. In addition, the range also offers Brazilian slate, Chinese quartz and Portuguese granite.

VITRIPIAZZA[®] Vitrified Porcelain Paving

Vitrified porcelain paving, carefully sourced from Italy which is renowned for its superior quality.

A Dutch range of cosmopolitan handmade clay pavers.

High quality artificial grass and extensive range of installation and cleaning accessories.

Landscaping installation, maintenance and cleaning products.

RESISCAPE[®] RESIN BOUND AGGREGATES

A resin bound aggregate system with a complementary range of installation accessories.

Purchasing our products

We have an extensive network of reputable stockists across the UK including builders merchants, landscape centres and garden centres, from which to purchase our products. Simply contact the Internal Sales Team for details of your nearest stockist or visit our website:

Why The Talasey Group

The Talasey Group works tirelessly to offer the very best product range and deliver consistently high levels of customer service. As a leading provider of landscaping solutions:

- We offer a one stop shop for all landscaping needs. Our founding brand Natural Paving, ensures a full end to end solution as we quarry, manufacture, import and distribute our own natural stone products, carina for them at each step of their journey.
- We offer a made to order service for bespoke requirements, see page 50 for more details.
- We ensure our products are of the highest quality and comply with the latest industry regulations. Where required, products are CE marked and have full test data available. (See the respective brand website for details.)
- Our products are imported from a number of countries across Europe and Asia to offer the best in choice and care is taken to ensure that they are ethically sourced. We are members of the Ethical Tradina Initiative (ETI), are verified members of the Ethical Stone Register and invest whole heartedly in our supply chain and the people that work in it, going above and beyond the requirements of the ETI.

TALASEY

Installation and design - Landscaping Professionals

If you, like many others, need a hand to design your dream garden or install your new landscaping products, we can suggest local and independent designers, contractors and installers, through the 'Talasey Landscaping Professionals' membership.

Find a list of your local designers and installers on our website: www.talasey.co.uk/landscaping-professionals

Each member is listed because they use and are familiar with our products.

Exceptional customer service

As a wholesaler, we work hard to ensure that our retailers, trade customers and consumers are looked after.

The success of the Talasev Group has been underpinned by providing the highest standards in product quality and excellent customer care. Our reliability is recognised by the industry and has been rewarded by The British Association of Landscape Industries (BALI) for a number of vegrs, with an award for delivering 'Exceptional Customer Service'.

UK's key trade associations.

Key terms glossary

Flamed	Undergoes a flaming process to give a slig and enriched surface colour.
Sawn	Cut to give a smooth, straight surface/edg
Honed	Lightly polished to give a smooth finish.
Tumbled/ Rumbled	Literally tumbled to give a weathered, age antique finish.
Bevelled	Where a stone edge has been cut at a slig also referred to as a chamfered edge.
Calibrated	Stone that has been machine cut to give nominal thickness. Calibrated stone is usef weight and/or limited depth for laying the issue. It is easier to install than non calibrate gives an ideal finish for internal use.
Hand Cut	Stone that has been hand split and left na a flagstone that will vary in thickness. Hanc an economical option and provides a mo finish with greater variance in the riven suff

Constantly developing our professional operations, we hold the following certifications and are active members of the

VITRIPIAZZA® Vitrified Porcelain Paving

The Vitripiazza Collection

Vitripiazza is a high quality, vitrified, Italian porcelain paving. Vitripiazza offers 58 different colours across 17 beautiful ranges, with a wide selection of accessories to create the perfect finishing touches.

Please visit www.vitripiazza.co.uk for further product information, laying patterns, product images and to download the Vitripiazza installation guide.

of the same little little

Benefits of Vitripiazza flagstones

Vitripiazza flagstones are a full bodied porcelain, meaning that the entirety of each flagstone is made from high quality porcelain, as opposed to cheaper vitrified ceramic tiles or alternatives that may just have a porcelain layer on the surface. Not only do the Vitripiazza flagstones offer a varied colour blend that reflects natural products, they also provide home owners with the ultimate choice in durability, longevity and style as they are:

Highly durable

- Resistant to attack from moss, mould and pesticides

Bringing the outside in

The Vitripiazza range is available in 18mm - 30mm thick flagstones, designed for external use. To enable you to bring the outdoors in and create a flush finish from your garden into your home, some of the ranges have a matching 10mm thick floor tile, for internal use.

Please note:

The same products that are available in both 10mm and external use thicknesses may vary in surface finish. The 10mm internal use tiles are slightly smoother than their external equivalent flagstones, which are a little more textured as they are designed for external use.

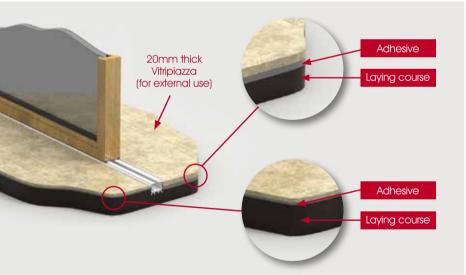

10mm thick Vitripiazza (for internal use)

Please note:

- All product sizes, weights and coverages stated throughout this brochure are nominal.
- forfeit any technical support.

Seramare with beautiful bespoke bullnosed edging see page 35 and 50

- Resistant to salt
- \bigcirc Non absorbent (<0.1%)
- Frost proof Easy to clean

• We recommend that Vitripiazza is only installed using Pavetuf Priming Slurry and jointed with either our Jointing Mortar, Compound or Grout. If these products are not used for Vitripiazza installation purposes, the integrity of the paved system is outside our recommended guide and will

• We advise that the installer mixes flagstones from multiple packs when installing any Vitripiazza product to avoid any potential colour banding. As Vitripiazza products are produced in batches, we advise that sufficient product for each project is purchased together and from the same batch, as there may be slight colour variations between different batches. Also mixing different size formats, different pack sizes and mixing from multiple packs may result in colour variations, so care needs to be taken when designing and ordering these products.

- CE marked and rated in our independently approved Stone Standard Scale*. For more details see the scale to the right and visit: www.naturalpaving.co.uk/helpful
- Ethically sourced. For more details visit: www.naturalpaving.co.uk/responsible
- Cared for at each stage of their journey, as our unique service offering means that we handle the stone from auarry to aarden.

*This applies to all sandstone flagstones and we have added their rating to each relevant product page throughout this brochure. For a detailed explanation please visit: www.naturalpaving.co.uk/standards

Stone Standard Scale for Sandstone

Benefits of natural stone over concrete: Superior quality, beauty and longevity

The prominence of natural stone landscaping products over concrete equivalents is unrivalled in that it provides a more beautiful and sustainable option.

Unlike man-made products, stone is a truly natural product simply taken from the ground and processed using low energy machinery, as opposed to needing high energy, fuelburning processes that pump vast amounts of CO₂ into the atmosphere, as there is when making concrete products.

Installation

If you are looking for help with the design and/or installation of your paving, you can find a list of Landscaping Professionals on our website www.talasey.co.uk/landscaping-professionals

For information regarding installation you can refer to our 'Understanding and Installing Natural Stone Paving' guide and there are also many independent sources of further detailed advice available, for example The Paving Expert www.pavingexpert.com

PLEASE NOTE:

Natural stone products are uniquely formed through geological processes, making each piece of stone characteristically subject to colour variations, veining, markings and occasional charming imperfections. As no two pieces are identical, natural stone products offer home owners a truly bespoke landscaping option.

Because of the nature of the product and potential colour variations, we recommend mixing product FROM ALL PACKS on site, to prevent colour banding.

Premiastone

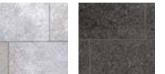

The Premiastone collection offers flagstones that have been machine cut to give a contemporary, smooth or lightly textured 'squared edge' look.

Premiastone flagstones are available in a combination of single sizes and project packs and in a large range of varying colours from warm pinks, cool creams and subtle greys, through to deep classic blacks. With so many options it is difficult to choose a favourite, however you can be sure that whichever makes its way to your garden, it will create a natural 'wow factor'.

Please note that all product sizes, weights and coverages, stated throughout this brochure are nominal.

The Premiastone range includes:

York Mix

York Mix is a sawn cut sandstone with clean edges and a slightly textured surface. Available in single size packs, York Mix reflects a look, similar to the popular 'York Stone'.

With a striking mix of buff and grey coloured flagstones, all packs should be opened and pieces mixed before installation, to prevent colour banding and to ensure the desired dual colour pattern that York Mix offers is achieved. Please note that some flags will be a mix of buff and grey whilst others can be all grey or all buff tones.

York Mix is also available in block paving, see page 126 for details.

Barley is a weathered sandstone with a softly riven surface and worn edges. With rich colours, this rustic flagstone

Classicstone

Classicstone is exactly what it suggests, the ultimate in timeless, traditional flagstones. Each hand cut piece has a naturally riven surface and edges that inspire a warm and natural olde worlde look.

Each flagstone within this range is distinct with unique varying colour palettes, differing riven surfaces, natural veining and occasional fossil prints. The Classicstone products are available in a combination of project packs, single sizes and circle kits.

Classicstone offers a range of sandstone and limestone products just as nature intended, 'unprocessed' and with a surprisingly economical and equally beautiful price tag.

Please note that all product sizes, weights and coverages, stated throughout this brochure are nominal.

The Classicstone range includes:

pg 118 **Classic Circles**

The Classicstone collection offers a range of matching circle kits, designed to enable designers and homeowners to create unique patterns and focal points.

Harvest

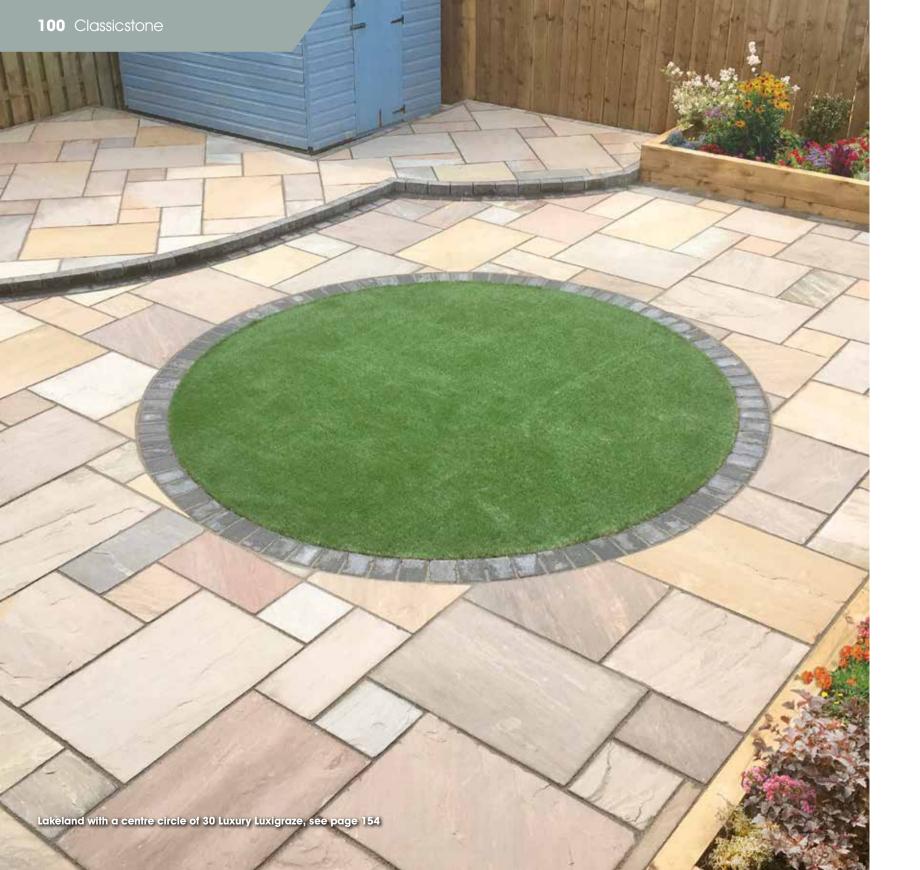

Harvest is a traditionally riven sandstone, with a variety of colour blends and product sizes.

Project packs create a traditional looking patio pattern whilst the single sizes can be used for a more modern effect. Although there is no difference to the surface finish, the finestone option is a thinner, lighter product which lends itself to projects with a modest budget.

Harvest is also available in circle kits (see page 118).

Lakeland

Lakeland sandstone is a best seller from the Classicstone range. Due to its popularity, Lakeland is available in project packs, single sizes, circle kits (see page 118), walling (see page 142), stepping stones (see page 146) and copings (see page 145).

A naturally riven flagstone with soft, natural tones and occasional fossil prints, Lakeland complements all landscapes. With an extensive product range in Lakeland, landscapers and home owners can design a truly unique and co-ordinated outdoor living space that flows with a consistency in colour.

Promenade

A classic sandstone with a cool colour palette, Promenade is available in modern single sizes, more traditional project packs and circle kits (see page 118). Predominantly a grey hue, Promenade can weather to expose brown and buff shades.

Although no difference to the surface finish, Promenade is also available in a finestone project pack, which is a thinner, lighter option to the thicker project packs, offering a more practical option for keener budgets.

Autumn Brown

Autumn Brown is a traditional sandstone with a riven surface and irregular interesting edges. With a warm colour tone, this product is attractive in any space, but lends itself well to a rural scene.

Autumn Brown is available in a calibrated project pack and a more economical finestone option.

Fossestone

Our natural stone block paving provides an attractive long term solution for driveways due to the durability of the individual blocks, making them natures alternative to concrete block paving. Fossestone is a well established range of block paving, offering driveways and entrances a true sense of style. All of the blocks are 50mm in depth, however this is a nominal thickness due to the natural, riven nature of some of the surfaces. The more intense the riven texture of the surface, the greater the variance there will be in the thickness.

With 7 inspiring colours that individually create a stunning finish, they can also be mixed and matched to incorporate contrasting borders and areas, in order to create unique designs. All products are available in mixed size project packs, with the exception of Midnight Blue and Ebony which come in single sizes.

Please note that all product sizes, weights and coverages, stated throughout this brochure are nominal.

The Fossestone range includes:

For more product images and laying patterns please visit **www.naturalpaving.co.uk** where you can also download the **'Understanding and Installing Natural Stone Guide'** for information on installation and how to get the best from your natural stone products.

pg 134 **Ebony**

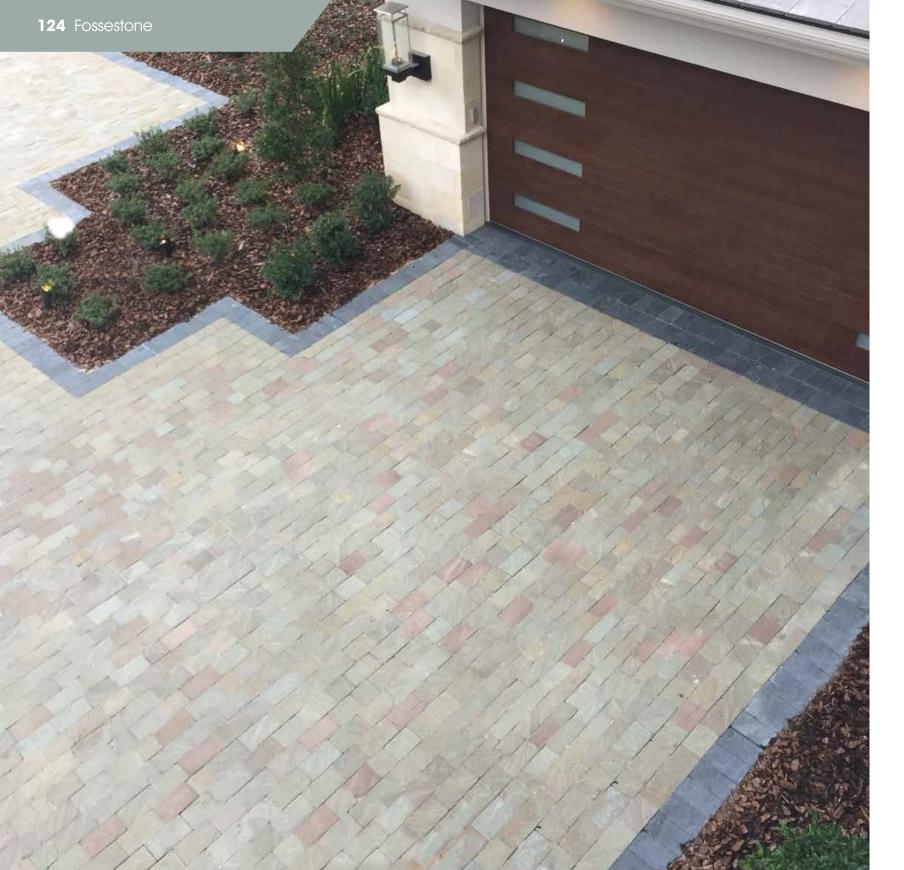

Orchard

Orchard is a sandstone block paver that is aged to create a riven surface and weathered look across all 6 sides. If you are looking for a matching flagstone to create a complementary patio alongside an Orchard driveway, we suggest Harvest or Maple, see pages 98 and 80 respectively for details.

		Nominal	Nominal	Number of pieces per pack Please note that sizes are nominal

Calibrated Project Pack	50	1200	8.5	128	80	56	

Forest

A sandstone block paver, Forest undergoes a rumbling process to create a weathered, textured finish across all 6 sides. If you are looking to create a flush finish from a Forest drive into a patio, we recommend Rydal or Lakeland flagstones, see pages 82 and 100 respectively.

		Nominal	Nominal	Number of pieces per pack Please note that sizes are nominal

Cinder

Cinder is a riven block paver, made of a rumbled sandstone to create a weathered look. Cinder has a palette of varying grey tones and can contain buff and brown shades, which may come to life as it is exposed to the elements. To match a patio to a Cinder driveway, try Platinum or Pumice flagstones, each have similar colour tones but different textures to suit, see pages 78 and 70 respectively.

Midnight Blue

Midnight Blue is a rumbled limestone with weathered edges but a smooth honed surface.

Midnight Blue comes in 3 different single sizes. Its versatility makes Midnight Blue a highly popular choice for driveways, and is also commonly used to edge contrasting block pavers and to form stretcher courses within patio areas. Midnight Blue has matching kerbs and edgings, see page 147.

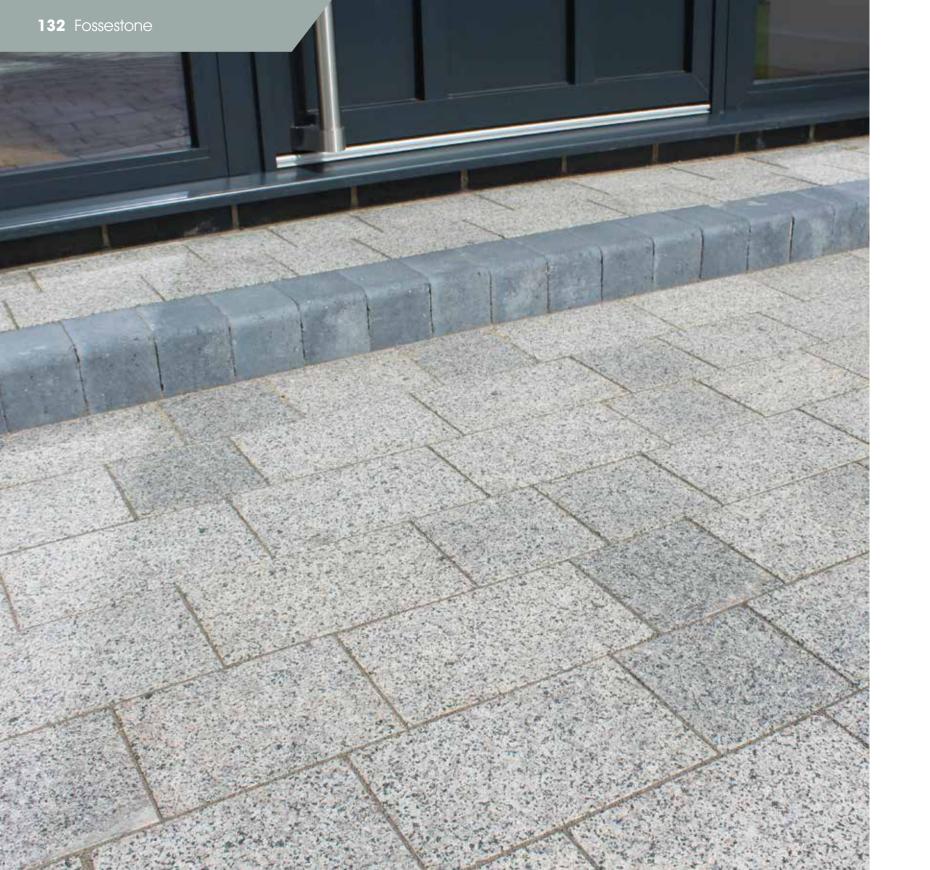

As Midnight Blue is a limestone, it may naturally lighten over time.

Weathered Cobbles

Our range of weathered cobbles can be used in a variety of applications including patios, paths, edging features, courtyards and driveways. Please note that if you wish the cobbles to take vehicular traffic, they must be laid on a full bed of mortar and we recommend a strong jointing mortar to be used for jointing the cobbles, like the Pavetuf Jointing Mortar (see page 162).

Our weathered cobbles collection includes 4 traditional options; Calico (sandstone), Ebony (limestone), Meadow (sandstone) and Pewter (sandstone), which are naturally split with an antique finish, ideal for cottage style courtyards and traditional settings.

Copings For Step Kits, Pools and Walling

Our versatile coping products have been designed for use as steps, pool copings and wall copings, enabling a consistent finish to be created within any designed landscape project. In a variety of colours, the range of copings will complement a wide range of our flagstones, walling and block paving. To suit different design preferences some copings are available with a bullnose edge and others with a natural edge. All are made from sandstone, except Carbon Black, which is a limestone and may naturally lighten over time.

Baksteen

Available in a range of colours and surface finishes, Baksteen clay pavers are tumbled to reveal a weathered and antiqued appearance.

Please note that product sizes, weights and coverage stated are nominal.

Please visit www.baksteen.co.uk for further product information

Continental

The Continental range offers a Dutch clay paver in a versatile rectangular format which can be used to create a brick effect, herringbone and many more styles. When laid on edge, on a suitably designed bedding and sub-base, these pavers will withstand heavy vehicular traffic. Alternatively, they can be laid on bed, making them suitable for pathways, garden borders, light vehicular traffic and pedestrian use.

Choose from one of our 9 colours or select more to create a unique blend.

Luxigraze

Each Luxigraze artificial grass product:

- Is supplied in 2m and 4m widths, up to 25m lenaths
- Can be cut to size (to the nearest 10cm) to suit the specific needs of individual projects
- Has a multi tone green pile, with a brown thatch, providing a realistic appearance

Please note that product sizes, weights and coverage stated are nominal.

Please note:

- We recommend that you roll out the artificial grass and leave to relax before you lay it.
- If your lawn requires multiple pieces of artificial grass always ask for a batch match, which will ensure a colour match.
- Pile direction needs to be taken into consideration when measuring, planning and installing.

For more detailed specifications, installation guide and information on our Luxigraze product range, please visit our website on www.luxigraze.co.uk

Luxigraze Artificial Grass

Luxigraze is a high quality range of artificial grass products designed for beautiful, all year round, low maintenance gardens. Luxigraze is available in a variety of specifications, each providing a durable, child and pet friendly lawn, creating a safe outdoor environment for all the family.

20 Premium - 20mm

With a shorter 20mm pile height, Luxigraze 20 Premium gives the appearance of a freshly cut lawn all vear round, Ideal for roof terraces, patios, balconies and lawns.

30 Premium - 30mm

Luxigraze 30 Luxury is a luscious, soft artificial grass, designed to provide a beautiful, realistic looking lawn. The natural texture is created by the soft, yet hard wearing yarn, providing a luxurious feel, which is particularly suitable for children to play on. A perfect choice for lawns, schools and nurseries.

32 Luxury - 32mm

Luxigraze 32 Luxury is designed to look as stunning as natural turf. This high quality artificial grass is flexible and durable, creating a soft and comfortable feel underfoot. Transform your lawn, garden or play area with this versatile artificial grass.

27 Super Luxury - 27mm

A top of the range, exceptionally lush artificial grass, Luxigraze 27 Super Luxury is a superior quality for garden lovers. Combining a dense deep pile, with natural looking multi green fibres, it is super soft yet super resilient, creating a luxurious lawn. Perfect for landscaping, gardens, schools and nurseries.

> Luxiaraze is manufactured to the highest standards, providing a 10 year UV

Luxigraze Accessories

Designed to aid the simple installation and maintenance of artificial grass, Luxiaraze offers its own range of accessories.

Installation

Luxigraze Adhesive - 310ml

- Moisture curing solvent free polyurethane adhesive with a high bond strength, for bonding Luxigraze Artificial Grass.
- Coloured green to blend with the artificial grass.
- Designed to bond the underside of artificial grass to jointing tape and/or the sub base for a secure finish.
- 1 cartridge covers 2-3 linear metres of Luxigraze Jointing Tape.

Luxigraze Jointing Tape - 20cm wide

- A strong geotextile fabric with a green laminated polyolefinic film to the back, to prevent the penetration of adhesive through to the under surface.
- Designed to be used in conjunction with Luxigraze Adhesive to join Luxigraze Artificial Grass.
- Available in 20m and 100m rolls or cut to length (to the nearest metre).

Luxigraze U Pins - 150 x 30 x 4mm

- Galvanised.
- Heavy duty.
- The best way to secure your artificial grass in to soft ground.
- The U pin will sit below the pile and its green top will be camouflaged.
- Supplied in packs of 10.

Cleaning

Luxiaraze Cleanser - 5Ltr

- A powerful concentrated artificial grass cleanser that is safe and easy to use.
- Designed for use on synthetic grass.
- Has a freshly cut grass fragrance.
- Removes dirt, grease, animal droppings, algae, and moss whilst rejuvenating and restoring the artificial grass back to it's original appearance.
- It will help suppress bacteria, algae and fungal growth.
- Dilute 1 part cleanser with up to 10 parts of warm water. Apply liberally by mop or spray and work in well with a brush.

Luxigraze Spot Cleaner - 1Ltr

- A powerful concentrated artificial grass spot cleaner that is safe and easy to use.
- Designed for use on synthetic grass in an easy to use trigger spray bottle.
- Has a freshly cut grass fragrance.
- Removes dirt, grease, animal droppings, algae and moss whilst rejuvenating and restoring the artificial grass back to it's original appearance.
- It will help suppress bacteria, algae and fungal growth.

Paveili

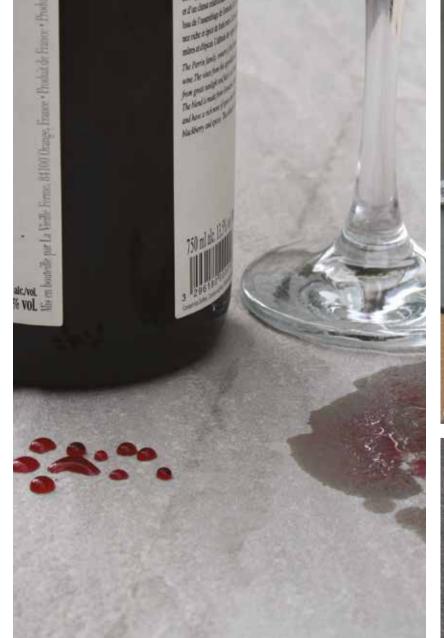

5.1

Pave

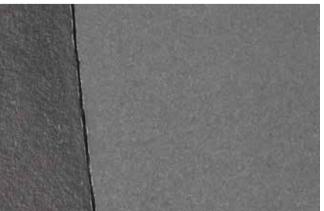

About Pavetuf

Pavetuf is a range of products designed to support the installation, maintenance and protection of your hard landscaping.

An established range of products, Pavetuf includes:

- A priming slurry to provide a secure bond between a new mortar base and stone or porcelain paving
- Two jointing options and a squeegee to joint paved areas
- Four porcelain Pavetuf jointing grouts
- A high performance cutting blade for porcelain
- A range of Pavetuf risers for paving and decking
- Two sealants to help protect paving from staining, each offering a different finish and look
- Five specialist cleaners, each designed to tackle different types of stains

Please note that product sizes, weights and coverage stated are nominal.

The Pavetuf family of products includes:

Installation Products	pg 161
Risers	pg 164
Sealants	pg 166
Specialist Cleaners	pg 168

Visit www.pavetuf.co.uk for further product information including 'how to' videos and safety data sheets.

Installation Products

Pavetuf Priming Slurry

Pavetuf Priming Slurry is a polymer and cementitious slurry, specifically formulated to provide an exceptional bond between a new mortar base and all types of stone and porcelain paving.

Pavetuf Squeegee

The Pavetuf Squeegee is the ideal tool to apply the Pavetuf Jointing Mortar and Pavetuf Jointing Compound.

Pavetuf Porcelain Blade

A specialist blade designed to cut porcelain.

Blade specification:

- - OSA approved
 - EN 13236

Pavetuf Jointing Grout

An easy to apply tile grout for internal and external use. Ideal for use with Vitripiazza porcelain paving and cladding products, available in a choice of 4 colours.

• 300mm (diameter) x 2.8mm • 20mm diameter bore

Pavetuf Jointing Mortar 15kg

The Jointing Mortar is a professional, rapid setting mortar which provides a contemporary and effective finish to paved areas.

When to use Pavetuf Jointing Mortar?

0	Pedestrian areas
0	Domestic driveways
0	Commercial driveways
0	Porcelain paving
0	Cobble paths & patios
I	Cobble driveways
0	2 person job, suitable for professionals
0	Requires a slurry run off area

Silver Grey Charcoal

Natural Buff

Pavetuf Jointing Compound 15kg

An easy to apply all weather Jointing Compound, available in a range of three colours.

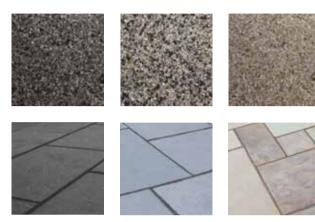

When to use Pavetuf Jointing Compound?

Pedestrian areas
Porous polished paving
Porcelain paving
Cobble paths & patios
1 person job, suitable for DIY ar trade professionals

Jointing compound can be used when a suitable permeable sub base is used, as this product requires drainage to set. *In wet and colder conditions curing can take considerably longer.

- No waste, excess product can be stored with water in the tub
- 15m²+ approx coverage
- Fast and easy to apply

Black

Grey

Buff

Pavetuf Risers

Pavetuf Adjustable Risers are used to create a pedestrian paving or decking surface for patios, flat roofs and balconies.

The range offers a wide range of sizes for both porcelain paved and decked areas, along with accessory pieces that work with both landscaping materials.

The elevated system is quick and simple to install, allowing services to be hidden underneath, promoting good airflow and can simply be lifted in the future for change of use.

The pedestals can be easily adjusted to the desired height and are very robust with a crush resistance of one tonne.

Please ensure that our risers are suitable for use in the project you are undertaking and refer to our technical information prior to installation www.pavetuf.co.uk

Pavetuf Adjustable Paving Risers

Pavetuf Decking Riser 140-230mm Quantity Per Pack: 40

Pavetuf Decking Riser 80-140mm Quantity Per Pack: 40

Treated with Pavetuf Invisible Sealant Once a Pavetuf sealant has been applied, it will not allow liquid to soak in immediately, giving time for any spillages to be cleaned away, preventing staining

Untreated

Sealants

Unlike most other sealants, the water based Pavetuf Invisible and Satin Sealants are unique and fully breathable, allowing efflorescence to escape, whilst preserving the look of the paving and acting as a barrier to protect it against staining. The Pavetuf Invisible and Satin Sealants can be applied as soon as the patio/path/driveway is completed.

- Protection against water, frost, oil and dirt
- High and lasting UV resistance
- Lasts up to 8 years, subject to trafficking and exposure to the elements
- Can be applied with a low pressure spray unit or brush

WATER AND OIL REPELLENT TOTAL PROTECTION FOR ALL POROUS PATHS, DRIVES AND PATIOS.

Pavetti

Invisible Sealant – 5ltr An easy to apply sealant that once applied, dries with a natural, almost invisible finish.

1ltr covers approx 5-10m²

Satin Sealant – 5ltr

An easy to apply sealant that once applied, dries with a satin, enriched look.

1ltr covers approx 5-10m²

Specialist Cleaners

Salt Eraser – 5ltr

After installation it is common for salt/efflorescence to rise from the cement in the mortar bed, travel up through the stone and then sit on the surface of stone paving, causing unsightly white marks. The Salt Eraser is a specific cleaning agent for the removal of salt/efflorescence from stone paths, drives and patios. As it penetrates deep into the stone it also prevents the reappearance of salt/efflorescence.

Each 5ltr tub covers approx. 5-10m² and can be applied with a low pressure/hand spray unit or brush.

After

Before

Rust Remover – 1ltr

An effective, non corrosive rust stain remover for stone landscaping products.

Each 11tr tub covers approx, 3m² and can be applied with a brush.

General Cleaner – 5ltr

The General Cleaner is a general purpose, everyday use cleaner. We recommend using this product to clean your paved area, prior to using a Pavetuf Sealant. Product should be diluted 1:5 with water and applied using a low pressure/hand spray unit or brush. Coverage varies according to the amount of contamination and the dilution of the product.

Green-Off Cleaner – 5ltr

The Green-Off Cleaner is a powerful and high performance cleaner that removes natural and organic soiling from paths, drives and patios, without damaging Pavetuf sealed surfaces.

Each 5ltr tub covers 15-35m² depending on use and can be applied with a low pressure/hand spray unit or brush.

5LTF

Pave

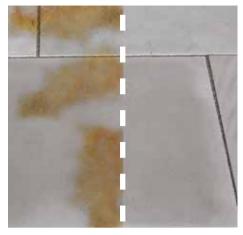

Deep Cleaner – 5ltr

Product can be used neat or diluted up to 1:20 with water depending on how heavy the contamination and applied using a low pressure/hand spray unit or brush.

Coverage varies according to the amount of contamination and the dilution of the product.

Before

After

The Deep Cleaner is a heavy duty and powerful cleaner for stone, clay and concrete paths, drives and patios, perfect for removing stubborn greasy stains. Although tough on dirt, it is kind to and will not damage Pavetuf sealed surfaces.

About Resiscape

Resiscape is quick and easy to install, and with 6 standard colours to choose from, homeowners and specifiers are sure to find the perfect colour to complement their project.

Resiscape can be used in a number of applications, including both domestic driveways and commercial projects.

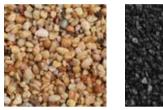

Please note that product sizes, weights and coverage stated are nominal.

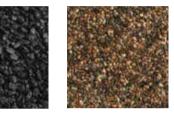

for further product information www.resiscape.co.uk

Resiscape Resin Bound Aggregate System

Dorset Gold

Black Basalt

- 6 standard colours to suit any project.
- of the largest piece of aggregate.
- For heavy traffic areas a thicker layer of the product is recommended.
- Colours are stocked and available direct to site within 48 hours.

Red Granite

Silver Blue

Brittany Bronze

Danish Quartz

• Our natural aggregates have been specially dried and are ready to use in pre measured bags. The Resiscape range offers

• Each Resiscape kit will cover a maximum of 4m² at a 15mm depth. The system should be laid at least three times the depth

• This is based on laying on a smooth surface and does not take into account surface texture or wastage.

Each 4m² kit contains:

- 3 x 25kg Bags of 2-5mm Aggregate
- 1 x 12.5kg Bag of 1-3mm Aggregate*
- 1 x 6.25kg Bag of C50 Sand
- 1 x Tub of Part A Resin
- 1 x Tub of Part B Hardener

Please note: All weights and measurements are nominal with a tolerance of +/-5%

*The Dorset Gold Aggregate is 1 - 2 mm

Resiscape Special Order Colours

If you are looking for something a little different, we offer 11 more colours to choose from. Please note these are only available on special order. The special order colours come in the same 4m^{2*} kits as the 6 standard colours, please contact us for lead times.

Star Dust

Twilight Moon

*Please note: All weights and measurements are nominal with a tolerance of +/- 5%

Golden Quartz

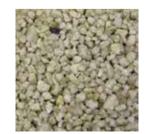

Green Granite

Regal Bronze

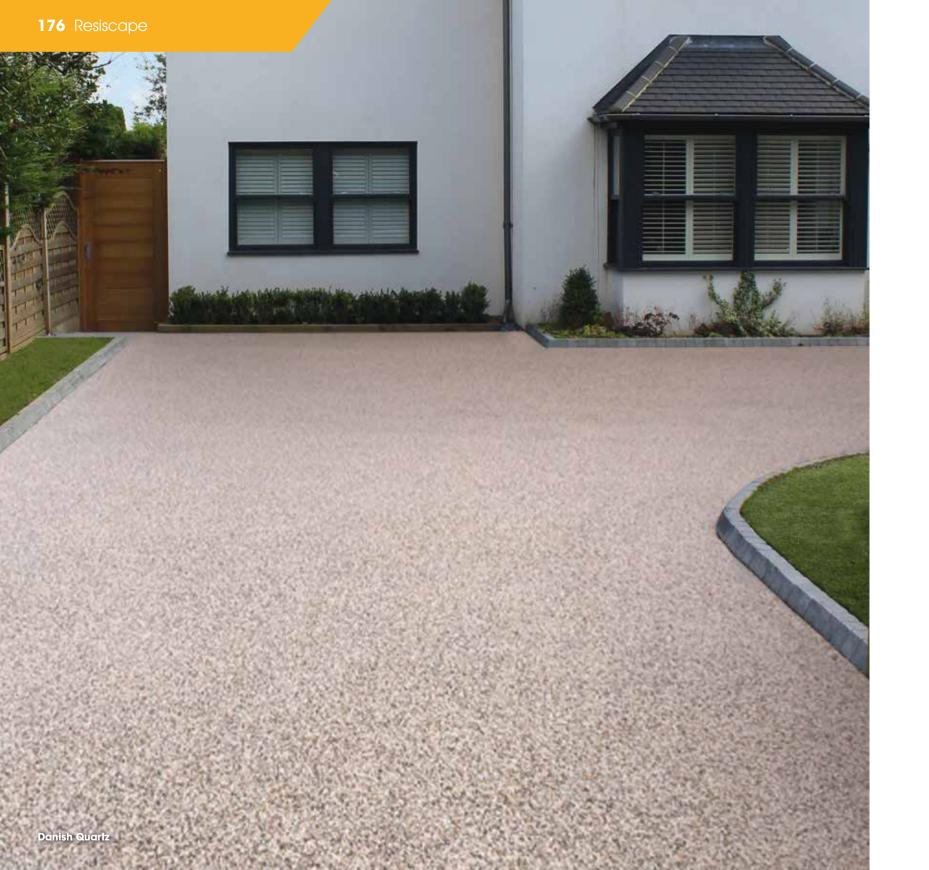

Winter Quartz

Silver Grey

Resiscape Accessories

Resiscape Spirit Cleaner - 5ltr

The Resiscape Spirit Cleaner is designed for use during the installation of resin bound systems. The cleaner can be used to clean the trowel used for installation as well as the forced action mixer, to prevent the resin/aggregate mix from sticking to these tools and curing. We recommend installers regularly clean the mixer and trowel during installation to aid application.

Top Tip: For a very even finish, apply the Resiscape Spirit Cleaner to the trowel and smooth over the laid surface.

Resiscape Primer - 5ltr

Resiscape Accelerator - 5ltr & 200ml

cooler than 20°C.

The table shows how much accelerator needs to be added to the mixture to achieve a curing time of 24 hours. If the accelerator is not used, it can take longer than 24 hours for the system to fully cure in cooler temperatures.

Resiscape Crushed Glass can be used during installation to provide extra anti-slip to the surface. The glass must be scattered over the tacky surface sparingly, to avoid any patches of glass which could then affect the colour of the installation. When scattered sparingly a 6.5kg bag can cover approximately 13m².

Resiscape Primer is recommended when installing onto a concrete surface creating a stronger bond between the resin and the sub-base. Each 5kg tin covers around 30m² and can be applied using a decorator's roller brush.

The Resiscape Accelerator can be used to speed up the curing time of the laid system if the air temperature is

Air Temp (°C)	Resiscape Accelerator Addition Ratio
20°	Accelerator not necessary
17.5°	4.4ml per 6.5kg bucket /4m² Kit
15°	9.8ml per 6.5kg bucket /4m² Kit
12.5°	16.6ml per 6.5kg bucket /4m² Kit
10°	29.3ml per 6.5kg bucket /4m² Kit

Resiscape Crushed Glass - 6.25kg

Talasey Ltd general product information and guidance

About us

Talasey Ltd is one of the UK's leading suppliers of high quality, ethically sourced landscapina products.

We supply a large range of branded landscaping products including Natural Paving, Vitripiazza, Baksteen, Pavetuf, Resiscape and Luxiaraze, to businesses and their consumers.

We have a team of highly experienced sales and technical staff who are available to provide advice and guidance on our products.

For further information please contact our Internal Sales Team on 0330 333 8030.

Purchasina our Products

If you would like to purchase any product/s from our range, please contact us directly through our Internal Sales Team. We can assist you by providing contact details for our network of stockists, designers and/or installers.

All sales will be subject to applicable Terms and Conditions which are available directly upon request. Samples of our products are available from our stockists.

Distribution

Talasev Ltd's products are available to our stockists for collection or delivery from our distribution centres at Tilbury, Doncaster, Southampton and Grangemouth.

All products must be checked on arrival and in the unlikely event of products reaching you in a less than satisfactory condition, please refer to your stockist immediately, allowing time for the affected product to be replaced. Do not lay any affected product as we will be unable to consider changing it.

About our Products

Products and materials, unless otherwise stated, are for domestic landscaping projects.

The product names of our Natural Paving range do not always relate to the geology of the stone.

All of our natural stone products varv in colour and texture. Each individual piece will have distinct markings and may contain natural imperfections and defects. Size variations will also occur and unfortunately this means we cannot guarantee particular sizes. All product dimensions are nominal and calibrated products are subject to variations. Traditional and processed stone materials may result in some delamination of the surface of our products. Many of our products are manufactured in batches, some product characteristics can vary from batch to batch. To avoid variation of colour between batches we recommend ordering enough product to complete the entire project. When ordering 2 or more packs, the product should be mixed from multiple packs to avoid colour banding.

Please note that customers need to cater for wastage when ordering our products. As a result of the natural characteristics, production and transportation methods of the stone up to 10% of any order may be unusable due to any of the following reasons (including without limitation): chips, blemishes, surface variations, breakages and discolouration. Therefore customers should order an additional 10% in the volume of product required.

A sufficient volume of product (in addition to this 10% uplift) may also be required to cover paver/tile positioning and any wastage caused by cuts in the installation process.

Over time, environmental conditions will impact on our products which may attract lichen, algae and/or other organic growths and the appearance of our products may be affected. The correct periodic cleaning of all of our products is recommended.

Due to the composition of natural stone and as its mineral content oxidises, colour variations may also occur. Some stones may suffer from efflorescence or staining from jointing, bedding and fixing compounds/mortar. For further important details about our products please refer to our product brand websites (www.naturalpaving.co.uk, www.vitripiazza.co.uk, www.baksteen.co.uk, www.pavetuf.co.uk, www.resiscape.co.uk, and www.luxigraze.co.uk)

How to Install and Product Care

Careful consideration must be given to the installation and care of our products. You should seek technical advice at all stages from your stockist, designer or installer as to the care of the particular product you have purchased.

In particular please be aware that you should consider whether the product can be used for the purpose you require. Also please note that some sealers and certain other materials can damage all of our products. Staining of our products can occur if they are not cared for or are used incorrectly. Specialist advice should always be sought if you are in any doubt. For further important details about installation and product care please refer to our product brand websites (www.naturalpaving.co.uk, www.vitripiazza.co.uk, www.baksteen.co.uk, www.pavetuf.co.uk, www.resiscape.co.uk, and www.luxigraze.co.uk)

Landscapina Professionals Scheme

Please note that our scheme is designed to provide a list of members that are independent contractors, installers and designers, to assist you in choosing a landscaping professional. Talasey Ltd cannot accept credit or responsibility for their actions and work, we can only quarantee the natural stone products, subject to completion of the required paperwork and criteria.

to lift. We recommend that suitable lifting equipment is used.

Health and Safety

Crated products should be stacked within the limitations of the around conditions and of the security of the pallet. We would recommend stacking crates / pallets of product no more than two high.

Appropriate protective clothing should be worn at all times and health and safety legislation should be adhered to when working with our products. When cutting our products either with chisels or rotary disc cutters it is essential that suitable eye protection is worn. Always ensure that suitable respiratory protection is worn to avoid the inhalation of dust particles produced by high speed cutting devices.

Acknowledgements

We would like to thank all of our Landscaping Professionals scheme members, customers and suppliers who have contributed to the production of this brochure.
